

Climateurope2

SUPPORTING AND STANDARDISING CLIMATE SERVICES IN EUROPE AND BEYOND

Climateurope2 is a **Horizon Europe Coordination and Support Action** that will run from 2022-2027. The project aims to support and develop the community of climate services in Europe. It also aims to increase the uptake of climate services and their standardisation process. **Climate services** are information and knowledge that can help people and organizations deal with the impacts of climate variability and climate change.

WHY JOIN THE CLIMATEUROPE2 NETWORK?

Climateurope2 will support the development of future equitable and quality-assured climate services of greater value to society, which will provide trustworthy, user-relevant and usable information.

For that, we need to involve all the actors in the climate services value chain. **We will develop a network across Europe to improve the connection, engagement and promotion of European climate service activities.**

**JOIN OUR
NETWORK**

In our network you will be able to:

- **Engage** with the community of climate services through the interactive Climateurope2 Platform
- **Participate in discussions** on the standardisation of climate services' components with the aim to reach consensus with the different actors involved
- **Have direct access to information** about good practices, recommendations, capacity-building materials, vocabularies and standardisation processes of for climate services
- **Be informed about activities** bringing the network together, including festivals, webinars, a roadshow, a webinar series, business breakfasts and much more!
